

Engine Codes

At times a vehicle manufacturer may use engines of the same size, be it in liters or cubic inches, in a particular year, make, and model vehicle. In these cases there is a need to further identify which engine has been installed. In most cars and light trucks, this is done as part of the VIN (Vehicle Identification Number) but in some cases, it is only identified on various locations of the engine itself. The VIN is a plate on the dash, seen through the drivers side windshield. This chart covers most vehicles made since 1982.

<u>Make</u>	<u>Engine code location</u>
Acura	On engine block
Audi	On engine block
BMW	On engine block
Buick	VIN- 8th character
Cadillac	VIN- 8th character
Chevrolet	VIN- 8th character
Chevrolet Trucks	VIN- 8th character
