## 4. First-aid measures

## **Description of first aid measures**

**Inhalation** Remove to fresh air.

Eye contact Remove contact lenses, if present and easy to do. Continue rinsing. Rinse thoroughly with

plenty of water, also under the eyelids. Keep eye wide open while rinsing. Do not rub

affected area.

**Skin contact** Wash skin with soap and water.

**Ingestion** Clean mouth with water and drink afterwards plenty of water. Never give anything by mouth

to an unconscious person. Do NOT induce vomiting. Call a physician.

#### Most important symptoms and effects, both acute and delayed

Symptoms May cause gastrointestinal discomfort if consumed in large amounts. May cause temporary

eye irritation.

## Indication of any immediate medical attention and special treatment needed

# 5. Fire-fighting measures

Suitable Extinguishing Media Water spray, carbon dioxide (CO2), dry chemical, alcohol-resistant foam. Use extinguishing

measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable extinguishing media Do not use a solid water stream as it may scatter and spread fire.

Specific hazards arising from the

chemical

Containers can burst or explode when heated, due to excessive pressure build-up. Thermal

Revision Date: 06-Feb-2020

decomposition can lead to release of irritating gases and vapors.

Hazardous combustion products Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke).

**Explosion data** 

Sensitivity to mechanical impact None. Sensitivity to static discharge None.

Special protective equipment for

fire-fighters

Firefighters should wear self-contained breathing apparatus and full firefighting turnout

gear. Use personal protection equipment.

# 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

Personal precautions Do not handle until all safety precautions have been read and understood. Avoid contact

with eyes. Ensure adequate ventilation. Use personal protective equipment as required.

## Methods and material for containment and cleaning up

Methods for containment Prevent materials or runoff from entering drains, sewers, streams, ground water or bodies

of water.

Methods for cleaning up Contain and collect spillage with non-combustible absorbent material, (e.g. sand, earth,

diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see Section 13). Clean contaminated surface thoroughly. After

cleaning, flush away traces with water.

**Reference to other sections** For additional information see: Section 8: Exposure controls/personal protection;

Section 12: Ecological information; Section 13: Disposal considerations.

## 7. Handling and storage

## Precautions for safe handling

Advice on safe handling Avoid contact with used product. Handle in accordance with good industrial hygiene and

safety practice. Do not eat, drink or smoke when using this product. Take off contaminated

clothing and wash before reuse. Wash thoroughly after handling.

## Conditions for safe storage, including any incompatibilities

**Storage Conditions** Keep containers tightly closed in a cool, well-ventilated place. Do not reuse empty

containers. Store away from incompatible materials. See section 10 for more information.

Protect from physical damage.

# 8. Exposure controls/personal protection

## Control parameters

Exposure Limits The following constituents are the only constituents of the product which have a PEL, TLV

or other recommended exposure limit. At this time, the other constituents have no known exposure limits. Under conditions which may generate mists, the following exposure limits are recommended:. Long-term exposure limit (8-hour TWA): 5 mg/m³. Short-term exposure

Revision Date: 06-Feb-2020

limit (15-minute): 10 mg/m<sup>3</sup>.

## **Appropriate engineering controls**

**Engineering controls** Ensure adequate ventilation, especially in confined areas.

## Individual protection measures, such as personal protective equipment

**Eye/face protection** If there is a risk of contact:. Wear safety glasses with side shields (or goggles).

**Hand protection** If there is a risk of contact:. Wear suitable gloves. Ensure that the breakthrough time of the

glove material is not exceeded. Refer to glove supplier for information on breakthrough time

for specific gloves.

**Skin and body protection** If there is a risk of contact:. Wear suitable protective clothing.

Respiratory protection No protective equipment is needed under normal use conditions. If exposure limits are

exceeded or irritation is experienced, ventilation and evacuation may be required.

**General hygiene considerations** Do not eat, drink or smoke when using this product. Handle in accordance with good

industrial hygiene and safety practice. Wash thoroughly after handling.
